EDUCATION

Oct 2020
Present

EDUCATION

I am currently pursuing a Bachelor of Nursing program at Suez Canal University. My education encompasses a wide range of courses, including fundamentals of nursing, medical-surgical nursing, maternal and child health nursing, mental health nursing, community health nursing, leadership and management in nursing, and nursing research. I take considerable pride in achieving high grades and receiving honors year after year. This program has given me the knowledge and skills necessary to excel in nursing and deliver comprehensive care to patients. I am determined to make a positive impact and provide exceptional healthcare services.

PROFESSIONAL EXPERIENCE

Mar 2021
Present

- Conducted extensive research on a complex scientific topic and authored a paper on the findings
- Designed experiments and conducted laboratory tests to explore research hypotheses
- Presented research findings and recommendations at conferences and workshops

SKILLS & ABILITIES

Microsoft Office
Research
Communication skills
Problem solving skills
Critical thinking

COURSES

Nursing Research: Principles and Methods
Peking University
Feb-Mar-2024

Setting the Stage for Success: An Eye on Safety Culture and Teamwork (Patient Safety II)
Johns Hopkins University
Feb-Feb-2024

Patient Safety and Quality Improvement: Developing a Systems View (Patient Safety I)
Johns Hopkins University
Jan-Feb-2024

COURSES

Infection Prevention in Nursing Homes
The University of North Carolina at Chapel Hill
Jan-Feb-2024

WHO-ICRC Basic Emergency Care: approach to the acutely ill and injured
WHO
Jan-Feb-2024

WORKSHOPS

Ways to effectively present research recommendations and findings – Feb-2024

International publication in nursing: selecting Q1 journal – May-2022

PROJECTS

ARTERY

Jan 2021 – Jan - 2024

This project had been done using health believe model, glow warm model, and create a website and mobile app to increase blood donation rate and the results of this project had been shown the blood donation rate had been increased up to 80% percent among Suez Canal university student.

New hemodialysis machine

06/2020 – 07/2023

The idea for the new hemodialysis is to use bio-hybrid technology to create a more efficient and effective hemodialysis machine. The new hemodialysis machine works with efficiency up to 100%, reduces the chance of dialysis complications, increases the chances of kidney transplantation in the future, and reduces the session period to be less than four hours.

The idea of this device was registered in the Egyptian Patent Office under a filing number (EG/P/2023/786)

PUBLICATIONS

“Decision Support Systems for Reducing Health Disparities: A Systematic Review.”

Published in the 9th annual scientific international conference of faculty of nursing Suez Canal university in collaboration with EDITHH COWAN university Australia.

Ismailia, Egypt Nov-2023

“Health Benefits of Blood Donation: A Systematic Review.”

Published in the International Conference of the African Asian Union
Cairo, Egypt Jan 2024
